Holiday Schedule -

No service on these holidays

Memorial Day

Independence Day

Labor Day

Thanksgiving Day

Christmas Day

New Year's Day

When the holiday falls on a weekday, collections for the remainder of the week will be delayed by one day. There is no service interruption or delay when the holiday falls on a Saturday or Sunday.

Mandatory Commercial Recycling - Is Your Business in Compliance?

Senate Bill 1383 mandates all businesses and multi-family residential dwellings to establish and maintain recycling service.

Recycling not only conserves our natural resources, but can save money by reducing waste disposal costs. Burrtec recycling coordinators can assist in selecting the appropriate recycling service level, along with the necessary education and outreach to residents and managerial staff. Please contact Customer Service for more information at (909) 620-1353.

HOW ARE BUSINESSES AFFECTED?

Under SB 1383, businesses are required to:

- Subscribe to organic waste collection service provided by Burrtec.
- Provide information to new tenants before or within 14 days of occupation of the premises.
- Prohibit employees from placing organic waste in a container not designated to receive organic waste.
- Ensure employees, contractors, tenants, and customers have access to an adequate number, size and location of containers with appropriate labels and container color.
- Provide containers for the collection of all waste streams including trash, food waste and recyclables in all areas where disposal containers are provided for customers, except for restrooms.
- Annually provide information to employees, contractors, tenants, and customers about organic waste collection requirements and proper sorting of organic waste.

EDIBLE FOOD GENERATOR TIPS TO PREVENT FOOD WASTE

Here are some ways businesses can reduce food waste:

- **Plan and track:** Plan meals based on demand and track waste to identify areas for improvement.
- **Menu design:** Create menu specials that use ingredients that are close to their expiration date. Remove items that don't sell well.
- **Staff training:** Train staff on how to minimize food waste, including proper temperature management and stock rotation.
- **Store food properly:** Store food in the refrigerator and use airtight containers for grains.
- **Monitor production:** Weigh food at each stage of production to identify and correct production loss.

California produces nearly half of the nation's fruits and vegetables, yet 1 in 8 Californians struggle with food insecurity, or lack of access to food that one needs to live a healthy lifestyle.

With the passing of Senate Bill 1383 (SB 1383), the State of California has mandated surplus food recovery to help combat the effects of methane gas on the environment. The bill requires commercial edible food generators to:

1. Arrange to recover the maximum amount of excess edible food that would otherwise go to landfills.
2. Establish a written agreement with any/all partnering organizations/services that accept edible food from your business.
3. Maintain records of all edible food recovery activities and receipts.
4. Provide copies of written agreement(s) with food recovery organization(s) each year.

HELP KEEP FOOD WASTE AND GREEN WASTE RECYCLING CLEAN!

Senate Bill 1383 requires a 75% reduction in organic waste disposal. All residences and commercial businesses are required to participate in and recycle organic waste including food and landscape waste. Food waste is collected, recycled, and made into new products such as compost, mulch, and renewable gas. During the sorting process, workers must remove unacceptable material such as trash, plastic containers, glass, and other contaminants.

Keeping your containers free of contaminants will help sustain recycling costs and keep material clean to create new products.

State Required Contamination Monitoring of Recyclables

California state law SB 1383 requires jurisdictions to monitor trash, recycling, and organics barrels to minimize contamination. Trash and other contaminants in the recycling or organics collection container(s) could result in a fee and non-collection due to contamination. If contamination is found, contamination tags (as shown to the right) will be affixed to the container lid. After the first notice, customers may be charged a contamination fee and the container will not be serviced as recyclable; it will be subsequently serviced as trash. Please note: the contamination fee will be automatically assessed if hazardous or bio-hazardous materials are placed in any collection container. Not sure about what goes in each container? Contact our Burrtec Customer Service at (909) 620-1353 for assistance. As always, thank you for your continued support and cooperation!

YOUR SORTING GUIDE - WHAT GOES WHERE?

Black Bin/Barrel is for trash

BAG ALL TRASH - DO NOT ADD HAZARDOUS WASTE

BLACK CONTAINER GUIDE
