Senate Bill 1383

Senate Bill 1383 is a California Senate Bill that focuses on reducing and properly recycling food waste to reduce harmful greenhouse gas emissions such as methane in our state. Reducing greenhouse gas emissions like methane can help improve air quality and lessen the impacts on health conditions such as asthma.

All residents of Rancho Cucamonga are required to divert food waste from the landfill by collecting food scraps (i.e. fruits, vegetables, food-soiled paper, leftovers, etc.) in a bag and placing the secured food scraps bag into your green waste bin.

For additional information about organics recycling and SB 1383, visit www.CalRecycle.ca.gov/climate/slcp and/or www.CityofRC.us.

What is Composting?

Composting is the process of recycling organic matter, such as leaves and food scraps, into a valuable fertilizer that can enrich soil and plants.
