Mandatory Commercial Recycling - Is Your Business in Compliance?

California Assembly Bill 341 mandates businesses and public entities, generating 4-cubic yards or more of solid waste and multifamily residential dwellings with five or more units, to establish and maintain recycling service. Recycling conserves our natural resources and conserves landfill space. Burrtec recycling coordinators can assist in selecting the appropriate recycling service level, along with the necessary education and outreach to residents and managerial staff. Call our Customer Service Office today to schedule a complimentary waste and recycling assessment.

SENATE BILL 1383 ORGANICS DIVERSION AND RECYCLING ARE YOU IN COMPLIANCE?

HOW DOES THIS AFFECT MY BUSINESS OR PROPERTY?

Businesses and multifamily properties are required to:

- Subscribe to recycling and/or organic waste collection service provided by Burrtec. (Customer must secure containers provided by Burrtec. If lost or stolen, customers are responsible for container replacement cost.)
- Annually provide information to employees, contractors, tenants, and customers about recycling, organic waste collection requirements and proper sorting of materials.
- Ensure employees, contractors, tenants, and customers have access to an adequate number, size, and location of containers with appropriate labels and container color.
- Provide containers for the collection of all waste streams including trash, food waste and recyclables in all areas where disposal containers are provided for customers, except for restrooms.
- Provide information to new tenants before or within 14 days of occupation of the premises.
- Prohibit employees from placing recycling and organic waste in a container not designated to receive those materials types.

WHAT ARE THE ADDITIONAL REQUIREMENTS?

Supermarkets, grocery stores, food service providers, distributors, or wholesale food vendors have additional edible food recovery requirements such as:

- Not intentionally spoiling edible food that is capable of being recovered by a food recovery organization or service.
- Making arrangements via contract with a food recovery organization or service to recover edible food that would be redistributed for human consumption.

WHY IS ORGANIC WASTE A PROBLEM?

- The state agency CalRecycle reports that organic waste in landfills accounts for 20 percent of the methane gas generated in California and that methane emissions reductions help in combating climate change.

The City of Rialto has applied for a revised implementation timeline. Compliance with this program will prevent the City of Rialto from receiving significant fines and penalties of up to \$10,000 per day.

The food waste recycling program is scheduled to start in January, 2024. More detailed information will be available as the program nears.

For more information about edible food requirements, please visit calrecycle.ca.gov

Holiday Schedule

Please note that services are interrupted on the following holidays:

| | | | | |
|------------------|--|------------------|--|-----------------|
| Memorial Day | | Independence Day | | Labor Day |
| Thanksgiving Day | | Christmas Day* | | New Year's Day* |

***Due to the 2022 Christmas and 2023 New Year's Day holidays on Sunday, there will be no service interruptions or delays during the holiday weeks.**

When the holiday falls on a weekday, collections for the remainder of the week will be delayed by one day. There is no service interruption or delay when the holiday falls on a Saturday or Sunday.

Contamination of Recyclables Could Result in a Fee

Burrtec is working in partnership with The City of Rialto to raise awareness of the importance of recycling, increase recycling participation and eliminate contamination from recycling and organics collection containers. This initiative is pertinent to the joint efforts of your community and Burrtec's continued recycling success as the state of California mandates become more critical. Please review details regarding the contamination fee/policy.

Contamination Fee

Trash and other contaminants in the recycling or organics collection container(s) could result in a fee and non-collection due to contamination. A Red Tag sticker will be left as a warning. After the first warning, customers will be charged a contamination fee and the container will not be serviced as recyclable; it will be subsequently serviced as trash. Please note: the contamination fee will be automatically assessed if hazardous or biohazardous materials are placed in any collection container.

Not sure about what goes in each container? Call Burrtec customer service at (909) 877-1596 for assistance. As always, thank you for your continued support and cooperation!

Attention Food Service Providers

Existing state law requires businesses that generate 2 cubic yards or more of commercial solid waste per week to implement a recycling and organics program. Effective July 1, 2020, the State of California now requires food establishments that provide trash containers for products purchased and consumed on the premises to also provide properly labeled containers for recyclables and organic waste (food waste). These containers must be placed adjacent to trash containers.

The new law applies to limited-service restaurants such as those restaurants where customers order and pay at the counter and bus their own tables after eating. The law will affect restaurants, malls, and other businesses that serve food. Full-service food establishments that do not provide access to trash containers for products consumed on the premises will be exempt, as food workers will likely separate post-consumer food waste and recyclables in the dish washing areas.

Requirements

- AB 827 requires collection containers at the front-of-house to be visible, accessible, and labeled.
- This law affects businesses that sell products that are meant for immediate consumption.
- Full-service restaurants where employees bus and clean tables are exempt but must provide labeled collection containers adjacent to trash containers for employees/staff to separate post-consumer recyclables and organics.

For further information regarding this law, please visit <https://www.calrecycle.ca.gov>

Help Keep Your Recycling Clean

As of 2018, China, the largest market for the world's recycling materials, enforced the new "National Sword" policy. This policy banned numerous materials including several types of plastics, unsorted mixed paper and set strict standards for contamination levels. This policy has impacted recycling operations across the United States. Stakeholders are now faced with the challenges of processing recyclables that have little to no market value. Lowering the levels of contamination and understanding that certain materials may no longer be recyclable can help. We need your support. In order to continue pursuing alternative markets and help contain costs, please help lower the levels of contamination by only placing acceptable materials in your recycling container.

Sorted recycle bales are shipped to recycling manufacturing companies and made into new products. At the sorting line at the Material Recovery Facility (MRF), workers must remove any contaminants— this is an essential but also time-consuming step that can slow down the process. If any contaminants are missed in the sorting process, the finished recycle bales could be rejected by recycling manufacturers and, therefore, not acceptable to be recycled. Keeping your containers free of trash and non-recyclable contaminants will help reduce recycling costs. Spread the message, "Help keep your recycling clean!"
