- ✗ Hazardous waste
- ✗ Liquids
- ✗ Metal
- ✗ Plastic
- ✗ Rocks

SENATE BILL 1383

AND YOUR COMMERCIAL BUSINESS

WHY IS ORGANIC WASTE A PROBLEM?

- Organic waste in landfills accounts for 20 percent of the methane gas generated in California. The state agency CalRecycle reports that the super-pollutant methane has a short life span, but a long-term impact on the climate. Targeting methane reductions in emissions is an effective mechanism for combating climate change and moving toward a more sustainable future.
- The implementation of the state's organic waste reduction regulations adopted under Senate Bill 1383 (Short Lived Climate Pollutants) is the next critical step to protect our communities and our environment from the impacts of climate change.

HOW ARE BUSINESSES AFFECTED?

Under SB 1383, businesses are required to:

- Subscribe to organic waste collection service provided by Burrtec.
- Annually provide information to employees, contractors, tenants, and customers about organic waste collection requirements and proper sorting of organic waste.
- Ensure employees, contractors, tenants, and customers have access to an adequate number, size, and location of containers with appropriate labels and container color.
- Provide information to new tenants before or within 14 days of occupation of the premises.
- Prohibit employees from placing organic waste in a container not designated to receive organic waste.

Follow Burrtec or visit Burrtec.com to learn more about:

Information on methods for the prevention of organic waste generation, recycling organic waste on-site, sending organic waste to community composting, and any other local requirements regarding organic waste.

A list of food recovery organizations and food recovery services.

Information on how to minimize the creation of food waste, utilize the food recovery organizations for excess edible food waste, ensure edible food waste is not intentionally spoiled, and document edible food waste contributions to the program.
