

SUSTAINABILITY UPDATE

THE 2023 FOOD WASTE RECYCLING PROGRAM AND YOU!

Organic waste that decomposes in a landfill releases significant greenhouse gas emissions that contribute to global climate change, extreme weather, and natural disasters. By composting organic waste, instead of sending it to landfills, we can close the loop on sustainability while creating a nutrient-rich soil amendment ready for use in farms and gardens.

Cathedral City residents can expect an organics program rollout in late Spring. Residents will receive notice before implementation. We look forward to seeing you at one of our educational outreach events.

SENATE BILL 1383

The California Senate passed a bill requiring a **75%** reduction in organic waste disposal by 2025.

All residences and commercial businesses will be required to participate in this program to recycle organic waste, including food waste.
